PROFESSIONAL SUMMARY

Experienced Frontend Developer with a flair for creating elegant, scalable web apps to solve interesting problems that delight end-users, With over two years' experience in both product ideation and development. I am an excellence driven individual with excellent communication, research, and critical thinking and leadership skills.

PROFESSIONAL EXPERIENCE

(June 5th 2022 – January 6th 2023)
Frontend Developer
Ecolabz – Remote

- Collaborated with the ui/ux designer to build the website, write modern, maintainable code for ecolabz web projects.

- Integrated third-party mailchimp API to improved product accessibility and communication.

- Work with different tools, platforms, frameworks, and backend as a service such as firebase.

- Significantly enhanced user experiences by designing and deploying web application features.

- I collaborated with the team to consistently meet project deadlines using Agile tools like Jira

Work Development
Ecolabz, ecolabz.io

At Ecolabz, a startup venture studio that focuses on ideating, creating, designing, developing and launching startups and companies. I developed the ui using maintainable codes.

Haraka, haraka.shop

Haraka is an online food and grocery order and delivery platform. Skip the confusing hours of searching and comparing vendors with all stores, reviews and delivery within your reach. I significantly enhanced the user experience by developing and deploying the web application.

PROJECTS

Portfolio Development

Movie App – Checkout

Movie web application to watch movies and TV shows

- Frontend library: Vue Js

- Styling and Library: Tailwindcss, Axios for implementing TMDB API

Invoice App – Checkout

An easy to use invoice generator for businesses.
